

Remote Student Study Packet
Grade K
March 30th - April 3rd, 2020
Week Two

Dear Kindergarten Families,

Welcome to the second week of remote learning! We hope you are well, and we are missing you all so much!

This week we tried to minimize the number of items to print to make it easier for you. If you are feeling overwhelmed, please focus mainly on reading and math with your student. The curriculum included is for a full day Kindergarten student. If your student is a half-day Kindergartener, feel free to participate in the science/history activities, along with the extra Specials classes; however, they are not part of the typical half-day kindergarten curriculum. In addition, if you are looking for more activities, the newsletter will again have optional enrichment activities.

Please look for an email from your child's teacher, which will include the phonics books your child should be reading this week. Teachers will also be sending you a link to sign up for a phone call with your teacher for the purpose of listening to your child read.

As always, if you have any questions, please reach out to your child's teacher. We are here to help!

Fondly,

The Kindergarten Team
